APPENDIX C	SECURITY CLASSIFICATION GUIDE FOR SECURITY PROJECTS AND RELATED INFORMATION (U)	C-1
APPENDIX D	SECURITY CLASSIFICATION GUIDE FOR INSCOM TELECOMMUNICATIONS INFORMATION (U)	D-1
APPENDIX E	SECURITY CLASSIFICATION GUIDE FOR PERSONNEL INFORMATION (U)	E-1
APPENDIX F	SECURITY CLASSIFICATION GUIDE FOR TAREX MATERIALS, INFORMATION, AND OPERATIONS (U)	F-1
APPENDIX G	SECURITY CLASSIFICATION GUIDE FOR MAP OVERLAYS (U)	G-1

1. (U) PURPOSE AND SCOPE.

a. (U) This pamphlet prescribes security classification guidance applicable to all elements of this command and should be used by officials at all levels to assure the proper security classification of national security information and material generated within the INSCOM.

b. (U) This pamphlet contains security classification guides applicable to INSCOM which are of themselves classified no higher than CONFIDENTIAL. USAINSCOM Pamphlet 380-2-1 contains additional security classification guidelines which are classified CONFIDENTIAL and SECRET and contain Special Intelligence (SI) information. Distribution of USAINSCOM Pamphlet 380-2-1 is restricted to activities with accredited Sensitive Compartmented Information Facilities (SCIFs). INSCOM Pamphlet 380-6 contains guidance applicable solely to HUMINT collection and dissemination. Each appendix of this pamphlet is an individual classification guide and may be used as such. As a separate guide, each appendix identifies the original classification authority who approved the guide and the reasons some of the information requires classification longer than 6 years.

\*This pamphlet supersedes USAINSCOM Pamphlet 380-2, 1 April 1977, including all changes.

## 2. (U) OBJECTIVES. The objectives of this pamphlet are to:

- a. (U) Provide to the extent practical a single source for classification determinations within INSCOM, less programs, projects, and systems for which a Department of Army (DA) approved security classification guide is required, as prescribed in paragraph 2-400, AR 380-5.
- b. (U) Implement the security classification principles of the DOD Information Security Program.
- c. (U) Publish security classification guidance issued by other agencies but which is not otherwise readily available to USAINSCOM users.
- d. (U) Consolidate known functional areas security classification guidance issued under the purview of INSCOM original security classification authorities.

3. (U) CLASSIFICATION GUIDES. There are numerous security classification guides published throughout DOD which are available for use by officials at all echelons. Classifying officials within INSCOM generally deal with application of derivative classification decisions. This pamphlet provides a body of such derivative classification guidance published by a variety of agencies, and which is generally not otherwise available to INSCOM users.

4. (U) ORIGINAL CLASSIFICATION. Original classifications are independent actions – new ideas, developments, etc., that are not covered by some other source which denotes a required security classification. In most instances within INSCOM, classified material is derivative in nature. Original classification authority is that authority required to classify independently any type of material.

5. (U) DERIVATIVE CLASSIFICATION. Derivative classification is the requirement to classify material created as a result of, in connection with, or in response to existing material, dealing with the same subject which already bears a classification. The classifications prescribed by this pamphlet and the security classification guidance prescribed by various Army regulations are derivative.

6. (U) DESIGNATION OF CLASSIFICATION AUTHORITIES. Original security classification authorities are designated and approved pursuant to paragraph 1-602, AR 380-5. Classifiers applying derivative classification decisions need not be designated as original classification authorities. The application of derivative classification decisions ensues from a responsibility to recognize and implement the classification decisions and direction of an original classification authority responsible for the functional area applicable to the information concerned.

7. (U) RECORD OF DECISIONS. The integrity of the security classification system is best preserved through the prudent application of classification decisions. This prudent application requires classifiers (original and derivative) to support their decisions by showing a direct connection between the information being classified and the national security of the United States. Classifiers are accountable for their classification actions. Accordingly, it is essential that all classification decisions be documented. This documented record of classification decisions may take the form of reference to an approved classification guide or a notation on the record copy of the justification for the classification determination.

- a. (U) IAW paragraph 4-104, AR 380-5, the classifier is required to maintain a record to show that basis for classification or by which the chain of classification authority can be traced to an original classification authority who can justify the initial classification determination, should occasion demand such action. Annotations applied IAW d, below, will satisfy this requirement and will allow tracing of indicated classification decisions to responsible classification authorities.

- b. (U) Derivative classification decisions are supported by the application of the appropriate notation indicating therein the classification authority, source document, etc.

- c. (U) Original classification decisions must be supported by a notation on the record copy which includes the rationale for the original classification decision, or independent records which can readily be made available in the event questions are raised regarding the classification decision.

8 April 1981

USAINSCOM Pamphlet 380-2

d. (U) Information classified according to this pamphlet will be safeguarded LAW Chapter V, AR 380-5. Such classifications are derivative and will be marked with declassification instructions which cite the specific paragraph number of this pamphlet applicable to the information and the date of declassification or date for review for declassification is to occur.

**EXAMPLE 1:** Information on the material (which is dated 7 Oct 1980) meets the criteria cited in paragraph B-3b. B-3b indicates that the information will be classified CONFIDENTIAL and has a Review/Declassification date of R-10 years. Hence, the document will be marked CONFIDENTIAL and bear the following regrading instructions –

CLASSIFIED BY: B-3b, INSCOM Pam 380-2 (81)  
REVIEW ON: 7 October 1990

**EXAMPLE 2:** Information on the material (which is dated 6 Oct 1980) meets the criteria cited in paragraph F-2. F-2 indicates that the information will be classified CONFIDENTIAL and has a Review/Declassification date of R-30 years. Hence, the document will be marked CONFIDENTIAL and bear the following regrading instructions –

CLASSIFIED BY: F-2, INSCOM Pam 380-2 (81)  
REVIEW ON: 6 October 2010

Marking in this manner meets the requirements of paragraph 4-104a(4), AR 380-5 to allow tracing of the classification determination to the original classification decision (made by an authorized original classification authority).

e. (U) When more than one entry in the attached appendices or other classification guides or source document is used to reach a classification determination, the original document will bear the following –

CLASSIFIED BY: Multiple Sources  
REVIEW/DECLASSIFY ON: (Enter the most restrictive period of time)

Hence, if the two examples shown above were used to classify a document (dated 9 Oct 1980) the marking would appear on the record or file copy as:

CLASSIFIED BY: B-3b and F-2, INSCOM Pam 380-2 (81)  
REVIEW ON: 9 October 2010

On the original copy as –

CLASSIFIED BY: Multiple Sources  
REVIEW ON: 9 October 2010

8. (U) **GOVERNING PRINCIPLES.** The basic premise of Executive Order 12065 and its implementing directives, DOD 5200.1-R and AR 380-5, is that officials must classify less information and declassify faster that information which initially required protection in the interests of national security. The Freedom of Information Act, as amended, emphasizes and compels that maximum information regarding government activities must be made available to the public. The 1974 Amendment makes possible the challenge of classification decisions by members of the public in civil litigation. Accordingly, it is incumbent upon all persons generating classification information (original or derivative) to fully assure that the information is, in fact, classified in the direct interests of national security and that –

a. (U) Such judgment can be fully supported in any possible adversary proceedings; and,

b. (U) The classifier can establish a clear chain of accountability to the authority which requires the respective information to be classified.

8 April 1981

9. (U) TENTATIVE CLASSIFICATION. Policy and procedures pertaining to assignment of original classifications by a person not authorized to apply original classifications of the respective levels is contained in paragraph 2-600, AR 380-5. INSCOM officials who apply tentative classifications may obtain approval of those classifications from an INSCOM original classification authority located in close geographic proximity, or may forward the candidate material through command channels to a higher level classification authority. Within this Headquarters, tentative classifications may be furnished to the Command Security Office (CSO) for approval.

10. (U) DOD PUBLISHED CLASSIFICATION GUIDES. DOD 5200.1-I contains a listing of all DOD security classification guides and the procedures to obtain copies of those guides.

11. (U) REFERENCES.

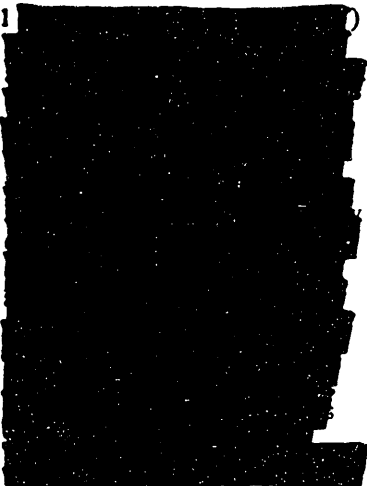

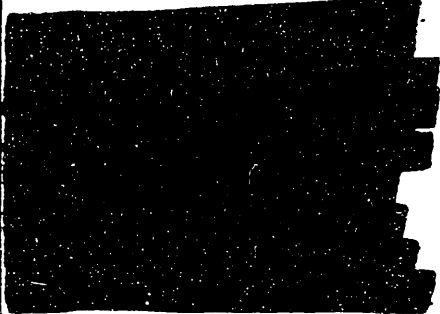

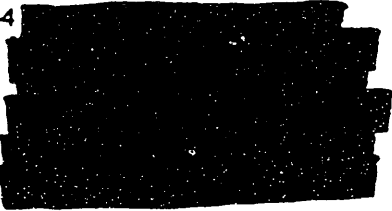

- a. (U) National Security Agency/Central Security Service (NSA/CSS) Manual 123-2 (S-CCO).
- b. (U) DOD Directive 5200.17 (M-2) (TS-CCO).

INFORMATION CONTAINING OR INFORMATION REVEALING	CLASSIFICATION LEVEL	REVIEW/DECLASSIFICATION DATE CITATION (Expressed in years from date of information)	REMARKS	CLASSIFICATION AUTHORITY CITATION (Expressed in applicable paragraph INSCOM Pam 380-2 (S1))
A-12 (U) The total dollar amount of the cryptologic community, NSA, or the cryptologic commands.	C	R-20	This determination is limited to the total annual budget figure. When specific purpose or items are shown, classify according to guidance specified in this classification guide.	A-12
A-13 (U) Summary totals of cryptologic budget submissions by individual appropriations, i.e., Research, Development, Testing and Evaluation (RDT&E), Procurement, and Operations and Maintenance (O&M)	C	R-20	This is limited to appropriation totals. When specific items are shown, classify according to guidance specified in this classification guide.	A-13
A-14 (U) Breakout of intelligence mission program which reveals current, past, or future fiscal year(s) and total dollars for cryptologic activities/communications, or general defense intelligence program	C	R-10		A-14
A-15 (U) Breakout of programs for Electronic Warfare (EW) equipment or SIGINT equipment which reveal future fiscal year(s) and total dollars for budget line items.	C	R-15	Earlier declassification becomes effective when the outyear dollars are submitted to Congress in the President's Budget. See the individual security classification guide for each system within a program element for specific declassification instructions.	A-15
A-16 (U) Breakout of ACSI, DA, or INSCOM programs which reveal current, past, or future fiscal year(s) dollars.	C	R-10		A-16
A-17 (U) Overall funding and manpower levels of the National Foreign Intelligence Board (NFIB) and its major program components.	S	R-20	<u>All NFIB resource detail</u> must be classified at least at the CONFIDENTIAL level.	A-17
A-18 (U) Personnel reports and documents, civilian or military, which indicate authorized or actual COMINT command strength in total, by organizational element, short title, or symbol by primary element or by function.	C	R-20		A-18

8 April 1981

CLASSIFICATION AUTHORITY CITATION (Expressed as applicable paragraph BSCOM Pam 380-2 (81))	INFORMATION CONTAINING OR INFORMATION REVEALING	CLASSIFICATION LEVEL	REVIEW/DECLASSIFICATION DATE CITATION (Expressed in years from date of information)	REMARKS	CLASSIFICATION AUTHORITY CITATION (Expressed as applicable paragraph BSCOM Pam 380-2 (81))
A-12	A-19 (U) Manpower figures which will reveal the level of effort on primary missions of the cryptologic community or individual activities/agencies of the US SIGINT System (USSS).	C	R-20		A-19
A-13	A-20 (U) The total strength (civilian and/or military) of the cryptologic community, NSA/CSS, or the military cryptologic commands.	C	R-20		A-20
A-14	A-21 (U) Manpower strength of staff, services, or support activities of cryptologic community and/or individual agencies when no cryptologic function or capability is shown	U		PL 86-36 states that no law shall be construed to require the disclosure of the organization or any function of the National Security Agency or any information with respect to the activities thereof, or the names, titles, salaries, or number of persons employed by such agency.	
A-15	A-22 (U) Manpower figures included in the military budget submissions in support of NSA/CSS, when limited to numbers and dollar cost, and when capabilities, purpose, mission, etc., are not shown.	U		See Remarks to A-21.	
A-16	A-23 (U) Command troop lists, manpower documents, and force structure documents reflecting the entire command, whether current and/or projected, whether published separately or as part of the total force structure list.	C	R-10	See AR 380-90 regarding explanation of terms: Troop List, Force Structure Document, and Manpower Documents.	A-23
A-17	a. (U) Troop lists, manpower documents, and force structure documents reflecting displays containing contingency plans and/or deployment data.	S	R-10		A-23a
A-18	b. (U) Those containing mobilization planning data, exclusive of deployment data.	C	R-10		A-23b
	c. (U) Unit identification or association of a unit with prepositioned equipment/supplies.	C	R-10	Location of prepositioned equipment is UNCLASSIFIED.	A-23c

SECURITY CLASSIFICATION GUIDE FOR SECURITY PROJECTS AND RELATED INFORMATION (U)

INFORMATION CONTAINING OR INFORMATION REVEALING	CLASSIFICATION LEVEL	REVIEW/DECLASSIFICATION DATE CITATION (Expressed in years from date of information)	REMARKS	CLASSIFICATION AUTHORITY CITATION (Expressed in applicable paragraph; INSCOM Pam 380-2 (81))
C-1 (U) INSCOM worldwide Security Identification Credential System:				
a. (U) Specific design characteristics of photographic credential inserts.	C	D-3		C-1a
b. (U) Criteria for issue, procedures and use of credentials.	U			
C-2 (U) Schedule of technical security services.			See INSCOM Pamphlet 380-6.	C-2
C-3 (U) Sensitive Compartmented Information Facilities (SCIFs):				
a. (U) Requests for accreditation which include details of security system, specific space designations and/or completed inspection checklists.	C-CCO	R-6	Caveat must be physically removed upon declassification.	C-3a
b. (U) The fact that a facility is a SCIF, provided details are not included.	U			
C-4 (U) Correspondence pertaining to drop accountability.	U			
C-5 (U) Vulnerabilities, deficiencies, compromises or other security hazards.	C	R-10	As a minimum, any information which reveals a security vulnerability or security deficiency must be classified at least CONFIDENTIAL. Higher classification may be warranted by the nature of the vulnerability, regulatory guidance, or other classification guid- ance. Additionally, if the vulnerability is likely to cause the compromise of sensitive compartmented information (SCI), then the information concerning the vulnerability must be handled with- in SCI channels. (See Appendix A, AR-530-3, for TEMPEST information.) Classification at the SECRET level is warranted if extensive vulnerabilities/ deficiencies are identified or if the facility is involved in sensitive operations	C-5

USAINSCOM Pamphlet 380-2

Appendix G  
SECURITY CLASSIFICATION GUIDE FOR MAP OVERLAYS (U)

INFORMATION CONTAINING OR INFORMATION REVEALING	CLASSIFICATION LEVEL	REVIEW/DECLASSIFICATION DATE CITATION (Expressed in years from date of information)	REMARKS	CLASSIFICATION AUTHORITY CITATION (Expressed in applicable paragraph INSCOM Pam 380-2 (81))
G-1 (U) Categorization of terrain features for use in troop movement planning.				
a. (U) Vegetation categorization related to military use of the area.	C	R-20		G-1a
b. (U) Surface configuration showing percent slope and heights of embankments related to tank capability.	C	R-20		G-1b
c. (U) Concealment (summer) overlays displaying percent chance of being observed from the air in August.	C	R-20		G-1c
d. (U) Concealment (winter) overlays displaying percent chance of being observed from the air in February.	C	R-20		G-1d
e. (U) Soils categorized to facilitate overland travel of military vehicles.	C	R-20		G-1e
f. (U) Cross-country movement categorized according to tank maximum speed and maneuverability.	C	R-20		G-1f
g. (U) Railroad and airfield compilation showing track configuration, length, and locations of sidings, bridges, tunnels with analysis emphasizing expected mobility requirements.	C	R-20		G-1g
h. (U) Hydrography overlay showing stream bottom material, bank slopes, bank heights, stream depth, width, and velocity with categories related to tank capability.	C	R-20		G-1h
i. (U) Elevation overlay derived from classified courses.	C	R-20		G-1i
j. (U) Highway overlay showing characteristics of all roads down to connecting roads (4-6 meters), road capacity, construction material, bridges, 15 meters or longer, vertical and horizontal, clearances; all related to our analysis of their capability to support military traffic.	C	R-20		G-1j
k. (U) Terrain assessment overlays combining vegetation density and percent of slope to indicate areas feasible for offensive and defensive combat.	C	R-20		G-1k
